Personal Statement:

I am a Civil Engineer and Project Manager with extensive experience in Project Management and Water Services operations & maintenance management in Zimbabwe, Botswana, Ireland & Saudi Arabia.

This experience includes project management and construction of building structures, implementation of potable water, foul drainage projects, municipal recreational and transportation infrastructure services.

I have worked in dynamic teams, & with stakeholders from different nationality backgrounds. This international exposure has built confidence in my management, decision making & leadership skills.

I am self-motivated, results oriented and solution driven professional, with a focus to achieve customer satisfaction and strategic & business objectives.

I am looking for opportunities in Project Management in Construction Sector and/or Water & Wastewater or Environment Services.

Education:

2007 MBS Project Management Degree – National University of Ireland

1992 Bachelor of Technology Engineering (Civil) Degree – University of Zimbabwe

Various other CPD & Health Safety Training

Key Skills

- Project Management & Reporting – Project scoping & approval, procurement, execution & commissioning
- Operations & Maintenance Management (Potable Water & Wastewater networks and plants)
- Construction & Refurbishment of civil works and office buildings
- Stakeholder Collaboration – Identify all Stakeholders & create strong working relationships to manage communication & interests
- Water Service Implementation - design, construction & Project Management
- Strategic -forward planning - Prepare detailed project plans, budget & timely resource allocation
- Digital Skills- MS Project, Excel, & other reporting tools to manage workflows, achieve quality compliance etc
- Budgets & Finance management & control – analysing expenditure & invoices using digital tools
- Leadership and Team Management - Inspire and guide site teams, effectively delegating responsibilities to achieve project goals.
- Safety Management - Oversee all aspects of Safety compliance to uphold health and safety regulations, ensuring safe workplace or environment.
- Negotiation & Conflict Resolution - Identify and resolve operational issues swiftly, keeping all parties informed of updates and progress. Interrogate details to avoid risk and issues escalation

Work Experience:

Current Employer

International Water Partners (IWP) (Saur/Miahona/Manila Water Joint venture (JV)).	March 2021 – To Date	Wastewater O & M Director
