- Responsible for the inspection of steel surfaces prior to sand blasting and ensure that it must be free from dirt, dust, oil & grease, Inclusion, engraving, delamination, sharp edges, mechanical damages and all kind of contaminations and identification of existing rust grades.
- Responsible to ensure that all welding joints should be free from porosity, sharp edges, welding spatters and other welding defects.
- Maintain all record of all equipment's used during sand blasting & coating application.
Responsible for maintaining the records for atmospheric conditions i.e. relative humidity, dew point, steel temperature, ambient temperature, difference between steel temperature and dew point.
- Closely observe that all abrasives used for sand blasting should be free from all kind of contamination and dust and checking the chemical composition and physical properties of it from data sheet provided by the supplier.
- Proper monitoring of the relative humidity in order to avoid condensation of water vapors.
- Responsible for maintaining the required degree of cleanliness and roughness after abrasive blasting.
- Responsible to ensure that surface should be free from all kind of defects prior to application of primer or base coat.
- To monitor all type of activities related to paint coating while application.
- Responsible for the conduction of all type of tests (Thickness Test, Holiday Test, Spark Test, Adhesion Test and Hardness
- Test on dry film thickness/Sample Plates as specified by the client.
- Responsible for monitoring the finish surface after each coat by mean of measuring WFT and DFT.
- To ensure that finish surface will be free from all types of coating defects.
- Authority to stop the work if environmental conditions are not suitable for the application of coating.

Company: ANDRITZ HYDRO **From:** 04-Aug-2016 **To:** 28-Feb-2021
Location: Golen Gol Hydro Power Project Chitral, Pakistan
Position Held: QC Inspector Coating / Painting

RESUME

Responsibilities as QC Coating/Painting Inspector:

- Responsible for raising all necessary RFI required by the Client prior to completion of each task, get approval after inspection, keep record and documentation.
- Checking of relative humidity, dew point and atmospheric conditions prior to execution of job at site by means of use of hygrometer & dew point and relative humidity Elcometer.
- Checking surface of steel before starting abrasive blasting and check its temperature.
- Checking of abrasive material as it is free for all types of contaminations.
- Monitoring of the surface cleanliness as per specified cleaning grades and conduction of Chloride test also degree of roughness can be measured by means of use of replica tape and dial micrometer and maintained record keeping.
- Verify that blasted area is free of all kind of contaminations, oil, grease & dirt prior to start coating and maintained documentation.
- Responsible for the verification of the Pot life, Induction period and safety and technical specifications can be kept in under consideration while mixing of paint, Inspection of the coating surface free for all types of defects, WFT & DFT measured and conduct of holiday test.
- Responsible for the verification of final inspection of all coated areas of pipes as per required specification and maintained record keeping.
- Monitoring the weather conditions, steel temperature, type & condition of the abrasive material and maintained records.
- To ensure that all QC tools and equipment's used while execution of job should be valid calibration, keeping the calibration record and documentation.

Company: Habib Rafiq (PVT.) LTD. **From:** 01-Jun-2015 **To:** 26-July-2016
Location: Attock Oil Refinery Upgradation, Pakistan

THIS IS TO CERTIFY THAT MR.:

SALAH UD DIN AHMED

Supervisor - Coating Crew, B# 409882, IQAMA NO. 2575108804

Has attended the company *in-house* training as a Crew Supervisor from 04 to 17 January 2025

The training included;

- MACHINERY OPERATION AND MAINTENANCE
- SAUDI ARAMCO STANDARDS AND REQUEST TESTS
- BLASTING AND PAINTING TECHNIQUES
- REVIEW OF THE MOST USED COATING SYSTEMS (APCSs)
- HEALTH, SAFETY AND ENVIRONMENT DURING BLASTING / PAINTING ACTIVITIES

His attitude was good and he showed good experience during the training

Mr. Ihab Moemen Bedir Elnagar

Manager - Project Qc

Mr. Abdul Rehman Khurram

Project Manager

SIGMA - GCCC – RA151

Certificate Of Attendance

Awarded to

Mr. SALAH UD DIN AHMED QAZI ABDUL LATIF (Coating Crew Supervisor) Iqama # 2575108804 of Gulf Consolidated Contractors Company for attending the training conducted from 22nd December to 30th December 2024 for the following topics.

Sigma Coating System APCS : 3 , 1A , 1B , 1C , 26 , 26T & 113A as per SAES-H-001 and SAES-H-101V

Surface preparation and its significance in coating

Application of liquid coating systems

Types of paints and curing mechanisms

Coating defect identification and rectification

Application techniques to avoid defects

Inspection and Testing

Health, Safety and Environment

FTS Engineer

Technical Sales Manager

Certificate of Proficiency

CSWIP CERT NO 572333

This is to certify that

Salah Ud Din Ahmed

Date of birth: 30 December 1987

has demonstrated proficiency as a BGAS-CSWIP Painting Inspector Grade 2 in accordance with CSWIP requirements published in Document BGAS-CSWIP-BG-22-12, 2nd Edition, April 2019 and amendments in force on the examination date.
