About Me

Dedicated Civil Engineer with expertise in designing, planning, and overseeing construction projects to ensure structural integrity, safety, and sustainability. Known for effective collaboration with multidisciplinary teams and a proactive approach to innovative, sustainable engineering solutions.

Skills

- Planswift
- AutoCad
- sketchUp
- Sap2000
- Microsoft
- Bluebeam

Education

Master of Transportation engineering

UET Taxila

2024-Present

B.Sc Civil engineering

UET Peshawar

2017-2021

Experience

Planning Engineer

The Value Engineering

February 2025-Present

- Lumber estimation for US construction projects
- Proficient in Bluebeam and PlanSwift for material takeoff
- Performed detailed lumber estimation for US-based projects using Bluebeam and PlanSwift
- Analyzed construction drawings to extract material quantities and optimize costs
- Ensured accurate takeoff calculations, considering waste factors and project requirements

Site Engineer

K&S Engineering Enterprise

January 2023-February 2025

Plans and designs public works projects,such as

- Road
- Building
- Bridges

Trainee Engineer

NHA

September 2021 - November 2021

- Conducted quality assurance tests on construction materials including soil, asphalt, and concrete.
- Performed laboratory tests such as Proctor compaction, sieve analysis, California Bearing Ratio (CBR), and compressive strength tests to assess material suitability and durability.
