JOB ROLES & RESPONSIBILITIES:

Supervision of the activities related to pipe work fabrication and installation, assuring that all activities are carried out complying with all quality and safety requirements. My responsibilities include:

- o Ensuring that applicable project specifications and standard codes were correctly executed during piping fabrication and erection
- o Interpreting all design, fabrication and erection drawings, and material specification including other engineering data.
- o Supervising fabrication and erection of pipe spools and pipe supports according to the latest issued construction drawings

- o Supervision of piping works to be performed by construction sub-contractor and to insure the compliance with the established construction activities
- o Ensuring that all site activities are performed in environmentally safe and responsible manner
- o Conducting weekly HSE assessments and safety walk through, as well as safe and unsafe auditing
- o Verifying engineering queries from sub-contractors at site and proposals, including to give recommendations
- o Evaluating the construction sub-contractors work capability according to the programs that have to be implemented and promote corrective action where necessary
- o Ensuring the proper execution of inspection and test in accordance with the field quality control plan and monitor the adequacy result
- o Solving the cases of no-conformity with the support of piping superintendent where necessary
- o Supporting the field engineering works such as field revision of isometric drawing and Technical Site Instruction (TSI) which are agreed by sub-contractors as per instruction
- o Monitoring the progress with schedules and updating to lead construction engineer
- o Preparing a test package as per piping system and test package priority schedule
- o Attending coordination meetings with client representatives, site manager and project management team; to assist on all commissioning activities
- o Execution of all current tasks commissioned or approved by the superior
- o Having knowledge and experience of following Health & Safety Standards Procedures.
